

## ACTIVITY MAT

An activity mat to facilitate programming and visualize the movements of the Buddy robot as well as offering students varied and fun learning contexts! It helps the student to better understand the distances, to situate oneself in space, and to check the validity of a programmed route.

The - Beach - mat comes in the form of a grid of 40 cm square boxes for the creation of original activities or to discover the sea world through beach games. A treasure hunt with Buddy to find shells while avoiding obstacles. Which path should Buddy take to get to the seaside? What trips does it have to make?

Description:	Printed mat on soft washable PVC tarpaulin
Dimensions :	200 x 200 cm
Weight :	1,9Kg
