

# COMPANION

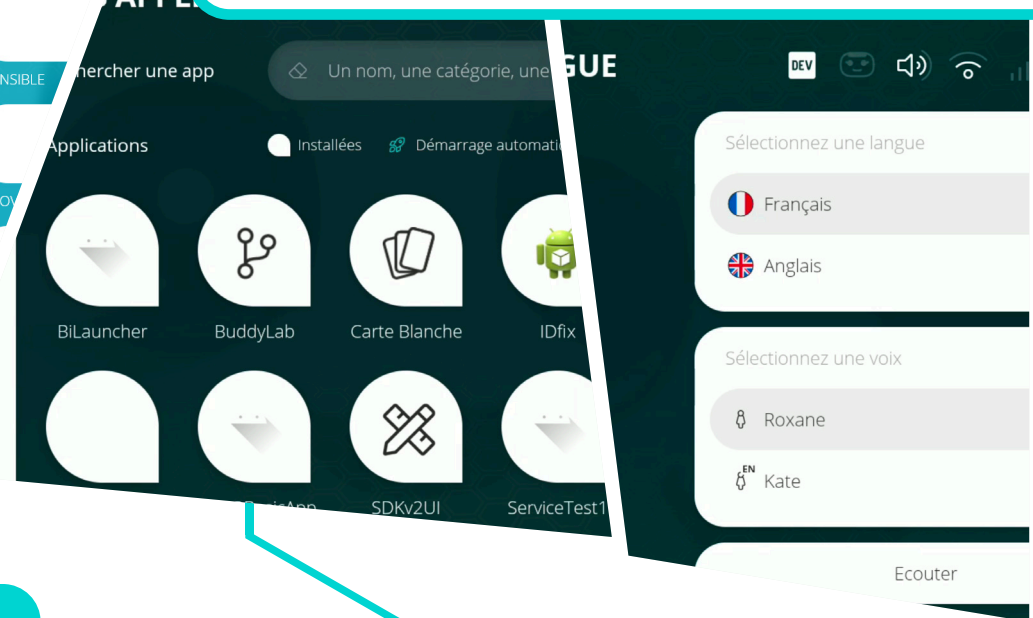

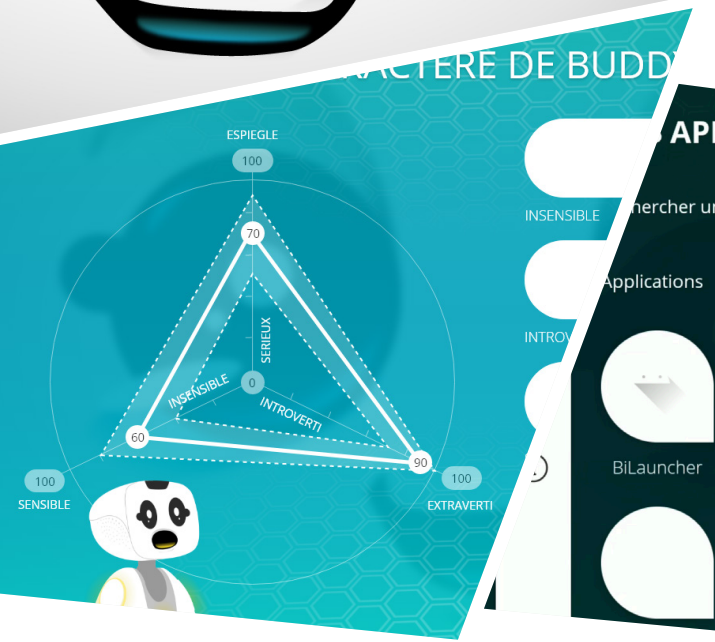

Buddy is a companion robot designed to interact with users through voice, vision or touch interactions. Buddy is also very emotional, it's able to express 12 different emotions: in love, grumpy, happy, tired...

You can trigger them by cuddling or teasing your robot. For example, Buddy doesn't like at all people putting their fingers in its eyes, it loves having its head stroked, behind or on its sides!

## FUNCTIONING

- Buddy can understand what is said to him.
- Beforehand, it is necessary to say "Ok Buddy" to trigger its ability to listen.
- Once triggered, Buddy goes into "listening" mode
  - its heart and shoulder LEDs are yellow/green
  - Blue waves appear on the sides of his face
- You can talk to Buddy!
- Please see the list of voice commands understood by Buddy in the user guide.
